1000 Planet & Star Names

Ennead Games

Introduction

1000 Planet & Star Names

You have an entire galaxy to explore. There are hundreds of stars and planets to discover and seek out. There's only one small problem...you need to name them....all of them...

Presented here are 1000 names suitable for a planet or star, covering each letter from A to Z, some letters having more options than others.

To use a d1000 chart, get 3 d10s, ideally of different colours (or roll the same one 3 times). Nominate one for the 000's, one for the 00s and the last for the 0's.

Of course there is nothing stopping you from making up your own, or simply picking one you like.

This is the perfect companion to [Multiverse Kit - Part 2 - Galaxies, Stars & Planets](#) or [Multiverse Kit - Part 3 - Planet Details](#), also done by Ennead Games
